Answer key

1. **A** - Add the ones: $4 + 5 = 9$. The 3 tens stay, so the sum is 39. Adding 5 to the tens digit gives 84, which is wrong.
2. **C** - 2 tens + 3 tens = 5 tens, and the 7 ones stay. The answer is 57. Adding only 20 gives 47.
3. **D** - 10 more is one row down, so the tens digit grows by 1: 74. The number 65 is only 1 more, and 54 is 10 less.
4. **C** - 10 less makes the tens digit 1 smaller: 8 tens becomes 7 tens, so 72. The number 92 is 10 more.
5. **A** - 8 tens - 3 tens = 5 tens, which is 50. The answer 5 forgets that the 5 is tens.
6. **C** - 9 tens - 6 tens = 3 tens, which is 30. Adding the numbers gives 150, which is wrong.
7. **B** - Make a ten: $38 + 2 = 40$, then $40 + 3 = 43$. Answer 53 adds 5 to the tens digit.
8. **D** - $2 + 7 = 9$ ones and the 5 tens stay, so $52 + 7 = 59$. Subtracting gives 45, which is wrong.
9. **D** - 7 tens - 4 tens = 3 tens, which is 30. Adding the numbers gives 110.
10. **B** - Take 20 away from 65 to get 45, and check: $45 + 20 = 65$. Adding 20 to 65 gives 85, which is wrong.

Remember:

- Add the ones to the ones and keep the tens: $34 + 5 = 39$.
- When you add tens, only the tens digit changes: $27 + 30 = 57$.
- 10 more is one row down on a hundred chart. 10 less is one row up.
- Subtract tens like objects: 7 tens - 3 tens = 4 tens, so $70 - 30 = 40$.
