Answer key

1. **D** – The hour hand is halfway between 9 and 10, so the hour is 9. The minute hand is on 6, which is 30 minutes. Reading the 6 as 6 minutes gives 9:06.
2. **B** – The hour hand has not reached 5, so the hour is 4. The minute hand is on 11, and 11 groups of 5 is 55.
3. **C** – The hour hand is just past 7. The minute hand is on 4, and 4 groups of 5 is 20. Reading the 4 as 4 minutes gives 7:04.
4. **A** – Count by fives 8 times: 5, 10, 15, 20, 25, 30, 35, 40. Each number is 5 minutes.
5. **C** – The numbers after the colon are the minutes: 15. On an analog clock the minute hand would point to the 3, which is 15 minutes.
6. **B** – Morning times are a.m. Breakfast is before noon, so the time is 7:30 a.m.
7. **D** – Afternoon times are after noon, so they use p.m. The other times are before noon.
8. **B** – Noon is the middle of the day: 12:00 p.m. The time 12:00 a.m. is midnight.
9. **A** – 8:40 has the hour hand between 8 and 9 and the minute hand on 8. Clock A has the minute hand on 4, and Clock B has the hour hand near 4.
10. **C** – All a.m. times come before p.m. times. Of the a.m. times, 8:50 comes before 9:15.

Remember:

- The short hand is the hour hand. The long hand is the minute hand.
- Each number on the clock is 5 more minutes, so count by fives.
- Minute hand on 12, 3, 6, or 9 means 0, 15, 30, or 45 minutes.
- Write minutes with two digits, like 7:05.
- a.m. is midnight to noon. p.m. is noon to midnight.
